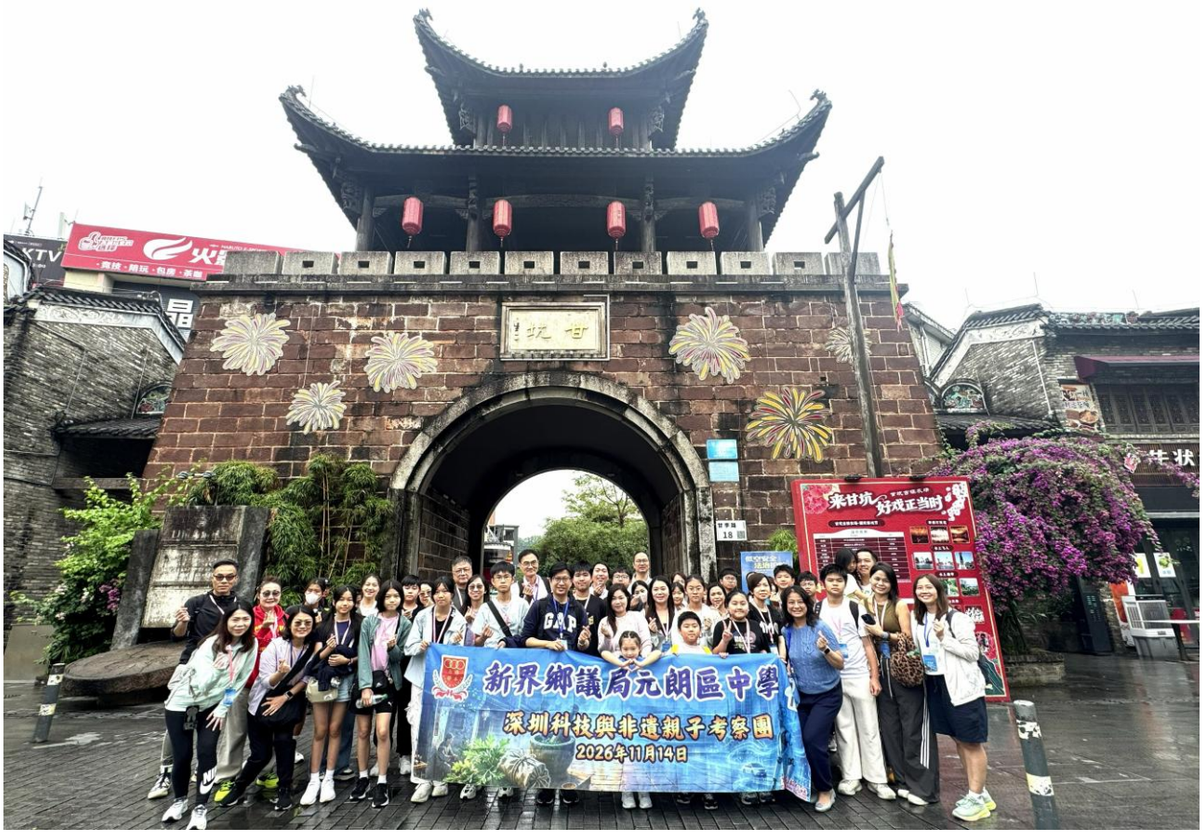
Parents and Teachers Association
Shenzhen Technology and Cultural Heritage Study Tour
(14 November 2026)

On 14 November 2026 (Saturday), our school's Parents and Teachers Association (PTA) successfully organised a parent-child study tour to Shenzhen, bringing together over 40 parents, teachers, and students.

The group began their itinerary at Gankeng Hakka Town, exploring historic Hakka architecture such as the Zhuangyuan Mansion, Gankeng Exhibition Hall, Diecui Building, and the Watchtower. Participants also engaged in hands-on intangible cultural heritage workshops – crafting wooden chopsticks and mugwort wellness hammers – to experience the charm of traditional Chinese craftsmanship firsthand.

In the afternoon, the tour visited the Shenzhen Handuan Technology AI Industry-University-Research Base to learn about the latest advancements in artificial intelligence and robotics. Beyond the educational visits, participants enjoyed authentic Lingnan Kung Fu cuisine at a local specialty restaurant. A lucky draw during the tour further filled the atmosphere with joy, and the study tour successfully strengthened parent-child bonds and fostered closer home-school collaboration.



Principal CHAN (1st row, 6th right), Mr. KWOK Wing-man, Assistant Principal (2nd row, 11th left), Ms. KWAN Ki-shun, Assistant Principal (1st row, 1st right), Ms. YAU Hau-yin (2nd row, 1st right), parents and students gather for a group photo at Gankeng Hakka Town to commemorate the visit

Principal CHAN, Assistant Principals, teachers, parents and students
experience intangible cultural heritage craftsmanship and showcase their handmade creations,
immersing themselves in the charm of traditional culture

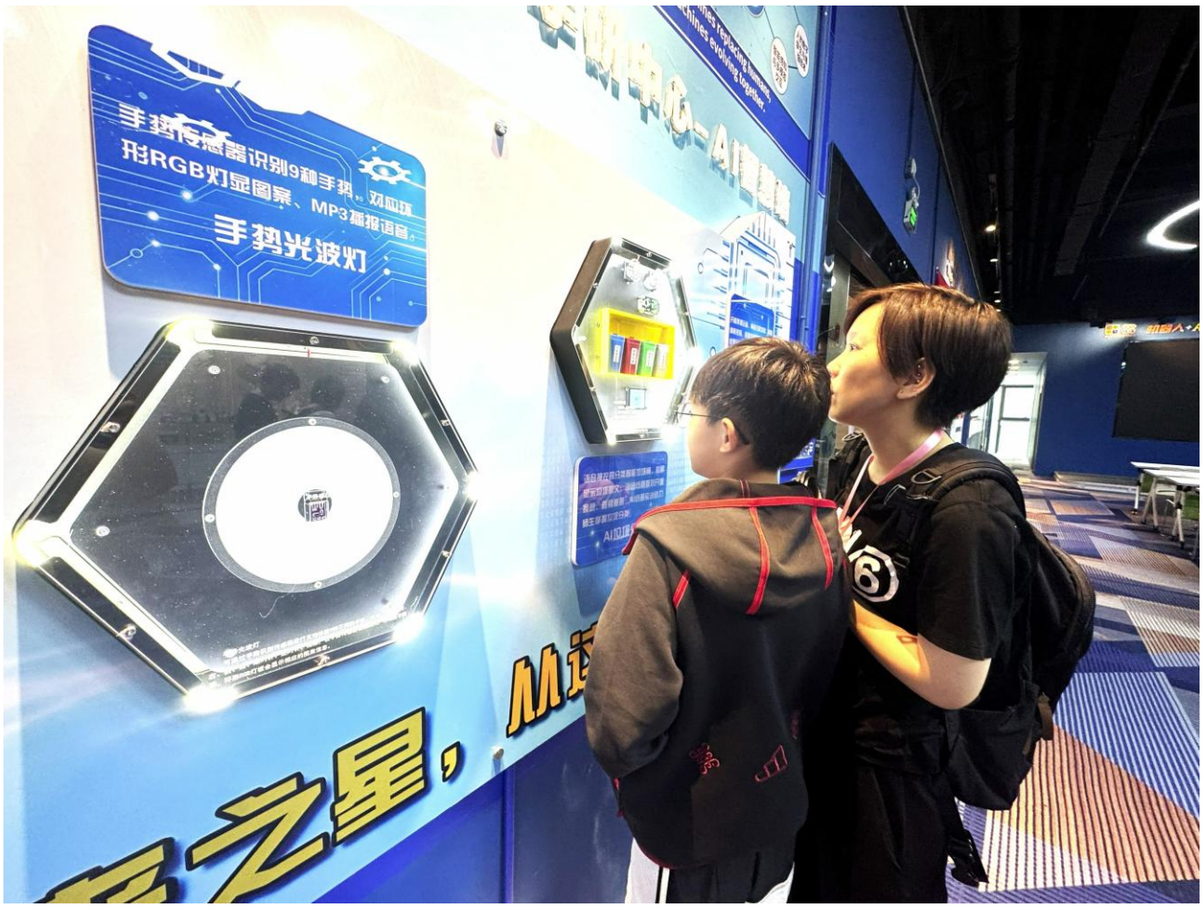
Teachers, parents and students experience traditional Hakka woodworking together,
handcrafting their own practical wooden chopsticks

Through the mugwort hammer-making workshop, parents and students learn about Lingnan mugwort folk traditions and traditional moxibustion wellness culture

A student uses his handmade mugwort hammer to massage his mother’s shoulders

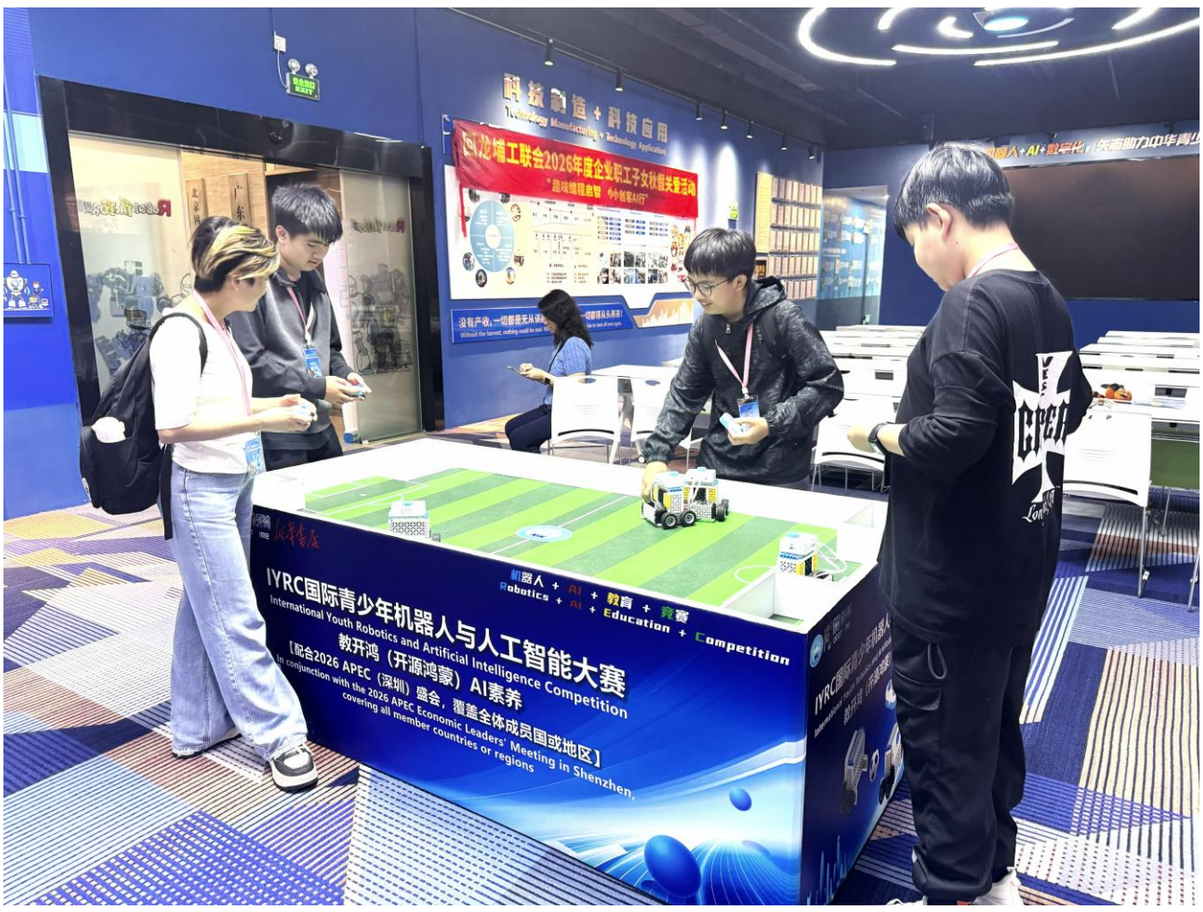
Participants pose for a group photo at the restaurant
after savouring authentic Lingnan Kung Fu cuisine for lunch

Participants listen attentively to the presentation
to learn about robotics and artificial intelligence programming



Parents and students explore the exhibits, gaining insights into the basics of artificial intelligence

At the interactive zone, parents and children control robots together
and explore how they work



Parents and students control the robots directly to experience the practical use of smart technology

Participants gather for a group photo at the innovation and technology exhibition hall after an enriching and enjoyable learning experience
