

Talk on the Bachelor of Nursing Programme, The University of Hong Kong

It was our pleasure to have invited Ms Hellene Yiu, Assistant Lecturer of the School of Nursing of The University of Hong Kong, to give a talk to our senior students on 20th October, 2015.

During the talk, Ms Yiu shared a lot of useful information of the nursing programme with our students including programme overview, curriculum structure and career prospects. Through this talk, students are able to get to know more about the nursing profession. All students have benefitted a lot from the talk.
