Campus Visit at the Hong Kong Polytechnic University

To implement career and life planning, our school joined Campus Visit Program organized by the Hong Kong Polytechnic University on 6 February 2017. Students were introduced the features of the programmes they are interested in, their admission requirements and career prospects. Through the visit, students obtained the most up-to-date information on the programmes offered by the Hong Kong Polytechnic University, which greatly helped them to make informed choices for their tertiary studies.
