

City Hunt for Auxiliary Medical Service Cadet Corps (New Territories West)

(23 February 2025)

The Auxiliary Medical Service (AMS) Cadet Corps organised a City Hunt on 23 February 2025 (Sunday). The activity aims to deepen cadets' understanding of their community by completing a designated route and accomplishing checkpoint tasks using clues provided by their instructors. It also offered cadets from different regions an opportunity to connect and interact with one another.

During the activity, our cadets demonstrated good qualities, personal attributes and excellent discipline. They were able to apply knowledge and skills they acquired to complete all the tasks joyously and successfully.
