

## **Dressing in Personal Protection Equipment Workshop**

(3 May 2025)

On 3 May 2025 (Saturday), the AMS Cadet Corps New Territories Heung Yee Kuk Yuen Long District Secondary School Platoon successfully completed a Workshop on Personal Protective Equipment (PPE). Under the professional guidance of a nurse instructor, cadets systematically learnt the correct procedures for wearing PPE, including standard operating protocols for protective suits, caps, masks, goggles, and gloves.

Through hands-on practice, cadets mastered key techniques such as donning and doffing sequences and fit checks, while gaining a deep understanding of cross-contamination risk control. Throughout the training, all participants were actively engaged, assisting one another to ensure each member could proficiently execute the required procedures.

This event not only effectively strengthened the team's safety awareness, but it also fully demonstrated the cadets' high level of discipline and teamwork spirit.
