

2025/26 Seasonal Influenza Vaccination School Outreach Programme

(8 October 2025)

The annual Seasonal Influenza Vaccination School Outreach Programme was successfully held on 8 October 2025 (Wednesday). We invited Dr. HUNG Chi-wan Emily, and her team from Cambridge Paediatrics Outreach to provide the vaccination service. A total of 502 students and 21 staff members received the seasonal influenza vaccine.

Receiving the seasonal influenza vaccine is regarded as one of the most effective methods to prevent seasonal influenza and its complications. It enhances students' immune defenses, decreases absenteeism due to illness, and significantly supports their health and learning.

Dr. HUNG Chi-wan Emily (6th right) and the Cambridge Paediatrics Outreach Team with Principal YUEN (center), Assistant Principal Mr. LO Wai-yan (6th left), Assistant Principal Mr. KWOK Wing-man (5th left) and Ms. CHOI Sin-yi (1st left)
