

PolyU SCIENCE Summer Internship 2025

(1 July – 31 August 2025)

6E CHAN Chun-yiu and **6E CHOY Kin-long** got the Second Runner-up in the PolyU Science Young Talents Competition 2025. As a result, they were invited to participate in the PolyU SCIENCE Summer Internship 2025 organized by the Faculty of Science at The Hong Kong Polytechnic University.

During the eight-week internship, the two students collaborated with PhD researchers. They explored organic synthesis and mass spectrometry, operated chromatography and spectroscopic instruments, and learned about protein structures. They also studied the application of LC-MS/MS in detecting harmful chemicals. This experience allowed them to engage in real research work, broaden their academic horizons, and gain valuable practical skills.
