

High-flyers' Sharing Session cum Secondary One Admission Information Talk (29 November 2025)

Three consecutive sessions of High-flyers' Sharing Session cum Secondary One Admission Information Talk were successfully held on 29 November 2025 (Saturday). 411 participants, including Primary Six students and their parents, together with some of their principals, assistant principals and teachers from 42 primary schools in Yuen Long, Tin Shui Wai and Tuen Mun, joined the event to visit our school.

Principal YUEN marked the beginning of each session by giving a welcoming speech, in which he introduced our school to the audience. Right after that, a team of high-flyers gave a lively sharing on their fruitful learning experiences and outstanding achievements of their fellow schoolmates. The sharing was followed by a video in which our graduates, who are also alumni of different primary schools, expressed gratitude to their alma mater and sent words of encouragement to motivate the young students to work hard and learn well, wishing them every success in reaching their ideal secondary schools. Our students provided guidance on Secondary One Admission Interview and shared their personal experiences. Ms. KWAN Ki-shun, Assistant Principal, provided essential details regarding Secondary One admission. Principal YUEN and the Assistant Principals responded to parents' inquiries during the Question & Answer session, providing essential information regarding S1 admissions.

Last but not least, there was a school tour led by our student representatives and Parents and Teachers Association helpers to visit the school campus. Parents and students observed science experiments and gained hands-on experience with several STEAM and digital education projects. They then went to our Visual Arts Room to appreciate a variety of students' artwork and visited our Technology for Life workshop to see students' design and technology projects. This allowed all participants to get a taste of Heung Chung's school life.

High-flyer MCs announce the start of the event

Principal YUEN gives a welcoming speech

Students give a presentation on their fruitful learning experience

Students share tips and experience of attending interviews with primary school pupils
