

New Millennium Robotics Challenge Cup 2026 (Food Guardian Combat)

(25 April 2026)

On 25 April 2026 (Saturday), our students achieved outstanding results in the ‘New Millennium Robotics Challenge Cup 2026 (Food Guardian Combat)’ organized by the Hong Kong Association for Computer Education and the Department of Engineering, Hong Kong Institute of Vocational Education (Lee Wai Lee). Among our three participating teams competing in the ‘Zero Carbon Programming Championship’, all three teams were awarded the **Third Prize**, while Team B was also honored with the **Best Technical Award**.

The theme of this competition is ‘Sustainable Food’. Participating teams were required to simulate the process of food supply and the recycling of food waste through the integration of technologies such as autonomous control of intelligent robotic arms, mechanical movement, human-robot collaboration, and artificial intelligence (AI) image recognition. This competition provided students chances to apply their knowledge to practical scenarios, strengthening their logical thinking, problem-solving, collaboration, and adaptability.

Award	Awardee	
Third Prize and Best Technical Award	Team B	1B TANG Cheuk-tung
		1B TANG Pui-yiu
		1B LEE Daniel Cheuk-man*
Third Prize	Team A	1B TAM Shing-hei
		1D LEUNG Ching-wun
		1D LIU Ho-nam
	Team C	1D FENG Jacob*
		1B SO Chin-yuen
		1C TSANG Yik-hei

*Responsible for pre-competition R&D, testing, and on-site support.
