

2026/27 Seasonal Influenza Vaccination School Outreach Programme

(16 October 2026)

The annual Seasonal Influenza Vaccination School Outreach Programme was successfully held on 16 October 2026 (Friday). We invited Dr. HUNG Chi-wan Emily and her team from Cambridge Paediatrics Outreach to provide the vaccination service. A total of 591 students and 16 staff members received the seasonal influenza vaccine.

Receiving the seasonal influenza vaccine is regarded as one of the most effective methods to prevent seasonal influenza and its complications. It enhances students' immune defenses, decreases absenteeism due to illness, and significantly supports their health and learning.
