

## The 8<sup>th</sup> Annual International Mathematical Modeling Challenge

(29 April 2022)

Our students achieved remarkable performance in the 8<sup>th</sup> Annual International Mathematical Modeling Challenge (IM<sup>2</sup>C 2022) organized by The University of Hong Kong Faculty of Engineering. Our school team first won the **Honorable Mention** in the Regional Contest and was awarded the **Meritorious Award** in the contest for the Region of Great China.

The competition aims to enhance students' applications of mathematical modelling to help them better understand, analyse and solve real world problems outside of mathematics itself. It also unleashes students' potential in mathematical modeling and scientific innovations.

Prizes awarded are as follows :

Event	Award	Awardee
8 <sup>th</sup> Annual International Mathematical Modeling Challenge For the Region of Greater China	Meritorious Award	3C HUI Ka-wing 4E KUNG Ka-ho
8 <sup>th</sup> Annual International Mathematical Modeling Challenge Regional Contest	Honorable Mention	4E MA Kui-shing 4E CAI Ching-hang
