

## Robo-Soccer Competition

(8 July 2023)

Among 34 teams, our junior form students were the **Bright Future Cup Champion** in the Robo-Soccer Competition organized by Education Bureau STEM Education Centre, Arts & Technology Education Centre and The Hong Kong University of Science and Technology. **2E CHEN Ziyang** won the **Most Valuable Player Award**.

Students designed the coding and installed the soccer robots themselves to play the football games. The aim of the competition is to cultivate students' creativity, collaboration skills and problem-solving skills.

Robo-Soccer Team members are as follows:

Award	Team Member	Post
