

## **Drone Operation and Programming Training Course (Elementary Level)**

(22, 23, 29 and 30 Dec 2022)

20 junior students participated in the Drone Operation and Programming Training Course organized by the STEM Department during Christmas Holiday. In the course, students learnt how to control the drones with remote controllers or by coding with Tello in order to dodge obstacles. The training course aims to cultivate students' interest in STEM development and enhance their knowledge and ability in code-writing and programming.
